Andy,

I do not think there were more comments. Attached are the revised documents in response to the comments. James McCord will give the webinar when requested. Just need to coordinate.

A few comments and a question from R7.

SSWR folks – I think the **Regions would be very interested in a webinar** on the findings presented in this paper. Has there already been one targeted to a regional audience and if so is there a recording?

Carole and Bobbie,

The following is the one comment from Region 7 chemist. Having worked in a program to identify structure of purity of chemicals for animal testing, I think this is an excellent questions.

I didn't see anything that immediately jumped out at me in the article other than a misspelled "prefluorinated".

There are a couple knit-picky comments on the other two.

Good morning Betsy,

ED_005565_00007174-00002

OST-HECD has been designated the lead reviewer for this manuscript. Please conduct a policy and factual review of the manuscript and complete questions 9 – 12 in the Transmittal Form (last attachment) and return comments to Mary Reiley by October 5.

OW Research POC's, if you have comments, please provide them to Mary Reiley by October 5. She will compile with those from OST and forward to Ed Ohanian and Owen McDonough for clearance.

Best,

Mary

Dear Ed, Mary and Carole

Attached for AN review is an SSWR-NERL product telling the story of the EPA nontargeted work in the Cape Fear River on GenX and other PFAS chemicals. (*Carole - R4 and NC partners have seen the manuscript for awareness, but please still send to them and the other regions).

Please send any comments by **Oct 5**.

Thank you,
Suzanne

Non-targeted screening based identification of per- and polyfluorinated contaminants in the Cape Fear River by high resolution mass spectrometry
